Subject: 628 Victoria St.

Dear Peter,

I am totally opposed to the application for Zoning By-Law Amendment (City File # D14-032-2017) with respect to 628 Victoria St. The applicants are seeking relief from far too many requirements for the size of the property as well as the streetscapes on both Victoria and Earl Streets. This will set a precedent that could enable greedy contractors and student landlords to transform more and more properties into massive student housing. What happened to the moratorium on 'monster houses'? What is being proposed for 628 Victoria Street is certainly equivalent to 'monster housing.' What is the point of the City's master plan if amendment after amendment after amendment is easily granted, turning our neighbourhood more and more into a student-dominated domain?

What can I do to block this application from being approved? Please get back to me with any suggestions you might have. Thank you.
