Project Name: King Street Multi-Use Pathway

Project Location: King Street from Trailhead Place to Union Street

Project Description: Provide a brief project overview including a description of the scope of the work and estimated timing for initial meeting and completion of the project.

Working in conjunction with Utilities Kingston who is completing water main work under portion of King Street, the City will be constructing multi-use pathways for pedestrians and cyclists on the north and south side of King Street from Trailhead Place to Portsmouth Avenue. We will be making modifications to the intersections of King Street and Portsmouth Avenue and King Street and Union Street to make them more active transportation (AT) supportive. We would like the Municipal Accessibility Advisory Committee to provide specific input on rest areas along the pathway and be aware of new AT features at intersections. Expected timing of the project would be construction in 2020 or 2021, design to be finalized in summer 2019 so the project could be tendered in fall 2019.
