Caution: This email is from an external source. Please exercise caution when opening attachments or clicking links, especially from unknown senders.

I am providing written comments to this application in accordance with the notice sent out by the city dated April 5, 2024.

I am in support of this application that is a modification, upgrading and improvement to existing facilities as opposed to substantially new works.

I further note that the CRCA have provided input that I am sure the applicant will follow.

I found that the notice of public meeting did not clarify that this was modification and upgrading of existing facilities, an important piece of information for residents and neighbours.

I also found it very difficult to determine whom to provide written input to (there is no contact information for the Secretary Treasurer, Committee of Adjustment).

If I have incorrectly sent this email to you, I trust you will make sure it gets to the appropriate people.

Thank you

Good Morning Chris, Happy Friday !!

I own the property at 927 Malvern Terrace beside 931 Malvern, the property looking for the Variance. I just wanted to pass on that I have no concerns about Martin and Concord Construction wanting to use a little more space on the lot in order to reconstruct a new Home that would maintain or increase the value of the existing homes in the area which I am happy about . There will still be 75' to the high water mark or the stream which should be lots of buffer space. The stream / creek or water body we are talking about is very high now with the Spring run off and the Beavers damming it further down the line so it makes it look like the lot is closer to the stream than it really is. The stream will go back to within its normal banks as the season moves on.

Please feel free to share my thoughts at the meeting Monday or contact me with any questions or concerns as I will not be able to participate , its Tire Season / Crazy Season here at work.

Thank you and have a Great Weekend.

Hello Chris

I wanted to offer some comments with regards to the application for the minor variance on Malvern Terrace put forth by Concord homes. I have lived in the Westwoods neighbourhood since the late 1980s. Growing up on Lynwood Drive and now raising my family in this community. The growth of this neighbourhood has always been something that has been positive. When we see homes change hands, It is often shortly there after that renovation trucks pull up. This community is one that has a broad landscape of demographics. Retired folks, young families, empty nesters , and everything in between. With new construction, this brings an extra vibrancy to a neighborhood. Increasing our property values, but also showing some different design. I would completely support this application as growth in our community is only a positive thing.

Concord has a stellar reputation with their track record and their quality construction. I know of this from a professional standpoint, as I have had the pleasure of working with them in a real estate capacity with clients of mine. They build homes that enhance a neighbourhood.

Please put forth any of my comments and I welcome any further thoughts or questions should you need any further assistance on this.

My direct number is [REDACTED].

Thanks Chris.

Sent from my iPad

As proud owners of 919 Malvern Terrace we firmly support the new homes being rebuilt by Concord Homes at 927 Malvern Terrace and 931 Malvern Terrace .

We have lived in this community for approximately 35 years and have seen many changes in our community and believe these Concord Home being constructed will only increase the value of our property.

We firmly believe Concord Homes to be excellent builders with the highest of standards building beautiful homes within existing communities .

Respectively submitted

Don and Marg Smith
